Business Analyst I - Underwriting | Requirements, UAT, Process Improvement & Data Analysis

SUMMARY

Business Analytics graduate with hands-on experience supporting requirements gathering, process analysis, documentation, UAT support, reporting, data validation, and stakeholder communication. Skilled in translating business needs into BRDs, functional specifications, user stories, process flows, acceptance criteria, and data-driven recommendations. Strong foundation in Excel, SQL, Power BI, Tableau, Agile/Waterfall, SDLC, data quality, and operational improvement, with interest in underwriting systems and insurance analytics.

CORE SKILLS

Business Analysis: Requirements gathering, BRDs, functional specifications, process flows, user stories, acceptance criteria, stakeholder interviews

Data & Reporting: SQL, Excel, Power BI, Tableau, data validation, data quality analysis, dashboards, KPI reporting, trend and variance analysis

Systems & Testing: SDLC, UAT support, test scenarios, issue tracking, troubleshooting, user support, Agile/Waterfall methodologies

Underwriting Support: Workflow analysis, operational efficiency, risk assessment concepts, policy process awareness, compliance-minded documentation

EDUCATION

University of Dayton

Master of Science in Business Analytics

May 2026

Dayton, OH

Sreenidhi Institute of Science and Technology

Bachelor of Technology in Electronics and Communication Engineering

May 2024

Hyderabad, India

RELEVANT EXPERIENCE & PROJECTS

Python Intern

Jan 2023 - Mar 2023

Python, Data Processing & Automation Support

- Translated technical requirements into Python scripts using pandas and NumPy to support data processing, validation, and repeatable reporting tasks.
- Debugged code issues, reviewed outputs for accuracy, and documented logic clearly to improve maintainability and stakeholder understanding.

Business Analytics Capstone - Lithko Contracting

Jan 2026 - May 2026

Business Analyst / Data Analyst | University of Dayton

- Gathered and translated business questions into analysis workflows, documented assumptions, validated datasets, and presented findings to stakeholders.
- Analyzed labor hours, project types, job starts, and economic indicators using Python, Excel, and SQL-style workflows to identify trends and forecast demand.
- Compared forecasting outputs using MAE, RMSE, and MAPE; summarized risks, data quality issues, and actionable recommendations for planning decisions.

SQL Database Design & Reporting Project

2025

Database / Reporting Analyst | University of Dayton

- Designed normalized relational tables and wrote SQL queries using joins, CTEs, CASE logic, views, date functions, and window functions.
- Validated outputs, documented report logic, and prepared analysis-ready datasets to support dashboarding, audits, and stakeholder reporting.

Customer Churn Analytics Project

2025

Data Analyst | University of Dayton

- Analyzed 6,400+ customer records using SQL and Python to identify churn drivers, clean data, validate fields, and generate business recommendations.
- Built a predictive workflow using logistic regression and performance metrics, then translated results into retention-focused improvement opportunities.

CERTIFICATIONS

Claude 101; AI Fluency: Framework & Foundations; Building with the Claude API; Introduction to Model Context Protocol; Claude Code 101 - Anthropic Academy, 2026

ADDITIONAL INFORMATION

Work authorization: Authorized to work in the U.S. under OPT. Open to Cleveland hybrid roles and relocation for strong Business Analyst / Data Analyst opportunities.
